Welcome...

to the 2024 Spring Edition of our Bull & Female Sale!

Welcome! It's that time of year again... time for the 2024 spring edition of the W4 Ranch's semi-annual production sale.

It is a great time to invest in some new genetics and we feel that this set of bulls are our best ones yet! In our offering, you will find three ET calves from Churchill Lady 5358; five sons of HH Advance 0025 and C L1 Dominette 495 B; and some of the best in straight L1 genetics and calving ease bulls. This set is moderately framed, muscular, and big footed bulls, ready for heavy service. We do not trim feet on these bulls, so we guarantee their legs and feet will hold up when put out in your breeding pasture. We truly feel these are some of our best bulls yet and feel they will do the job, whether it's in a purebred herd or a commercial operation.

National cow herd numbers are down; calf prices are up; and parts of Texas are finally seeing some rainfall, so now is a great time to invest in females. We are offering 30 first calf heifers, all with black baldy calves at side and ready to be bred back to the bull of your choice. These deep, functional females are ready to go to work for you and come with a return on your investment at their side. We are also selling 50 heifers bred to Hereford bulls and 90 heifers bred to low birth weight Angus bulls. All of these females will calve this fall.

Once again, Superior Livestock Auctions will offer internet bidding during the sale. As always, the cattle will be available for viewing anytime the week of the sale, just give us a call and we will be happy to give you a tour of the sale offering. Please join us for lunch at 11:00 a.m. on sale day. If you have any questions, please don't hesitate to call us.

We hope you can join us on April 20!

Jeff Chaffin, Manager
254/396-2785

*We are proud to present our 2024 Spring Cattle
for your evaluation!*

The Offering

70 Hereford Bulls

All two-year-olds

30 Registered Hereford Heifers

Spring Calving Pairs with Angus Calves at Side

50 Registered Hereford Heifers

Fall Calving Bred 4 and 5 months to Low Birth Weight Hereford Bulls

90 Registered Hereford Heifers

Fall Calving, Bred to Low Birth Weight Angus Bulls

**Sale will be broadcast online at Bid.SuperiorLivestock.com —
See page 53 for bidding information.**

Schedule of Events

SATURDAY, APRIL 20, 2024

8:00 a.m. – Coffee, donuts and viewing of cattle

11:00 a.m. – Lunch served

12:30 p.m. – Spring Production Sale

Saturday, April 20, 2024

12:30 p.m. CST ... at the ranch, Morgan, Texas

Sale Location

W4 Ranch-Steele Creek Headquarters, located on FM 927 between Lakeside Village and Morgan in Bosque County, Texas or 4 miles east of Morgan from Hwy. 174.

Accommodations

Hillsboro, Texas, 29 miles from the ranch

Sale Headquarters: Ramada Inn
 (254) 582-3493 or (877) 200-3392

Other lodging at

Comfort Inn (254) 582-3338

Holiday Inn Express, (254) 582-0220

Also in Clifton, 20 miles from ranch

Best Western, (254) 675-8999

Air Travel

Dallas/Fort Worth Airport is serviced by most major airlines and is 90 miles from ranch. Waco Airport is located just 40 minutes from ranch. We have a private FAA approved airstrip located on the ranch that can accommodate most all private planes. W4 Ranch airstrip's new location identifier for the landing facility is 84TE.

A 75' wide x 4,500' long asphalt runway.

Call (254) 635-4444 for shuttle to sale barn.

Sale Day Phone

(254) 635-4444 - Phone bids welcomed

Terms of Sale

Terms of sale are CASH, to be paid in full at the conclusion of the sale. We will be glad to consider special terms if arrangements are made prior to the sale date. Contact Tom Johnson.

Sale Conditions

Each animal will be sold to the highest bidder with the auctioneer settling any disputes as to bids. Each animal will become the property of the buyer as soon as sold.

Guarantee

All cattle are guaranteed to be breeders; all females having been examined safe in calf will be considered as proven breeders. Any bull subsequently found to be a non-breeder may be returned in good condition and with our permission within six months of the sale date. We reserve the right to try any reported non-breeder for six months and if we cannot confirm the animal as a breeder will refund the purchase price.

Herd Health

Individual health certificates for interstate shipment will be furnished on all sale cattle. All test-age cattle will have been tested negative for Brucellosis. All the cattle have been vaccinated for 7-Way Blackleg, Lepto and wormed. Mark Jackson, DVM serves as our herd veterinarian.

EPDs

EPDs in this catalog were obtained on March 18, 2024.

Note

All persons attending the sale do so at their own risk. W4 Ranch nor any person connected with the sale assumes liability, legal or otherwise, for any accidents which may occur.

WHY IS THE PURINA® ACCURATION® AND PURINA® WIND & RAIN® MINERAL THE RIGHT FIT FOR MY OPERATION?

One size doesn't fit all, especially in the cattle world.

That's why Purina® Accuration® and Purina® Wind & Rain® Mineral give cow/calf producers flexibility to select from high-quality nutrition options to create a whole herd nutrition program that best fits their needs. Purina® sets the foundation for success with elite, complete nutrition programs. Producers can also choose to enter additional value-added programs that are amplified by the research-based and time-tested approach of Purina Animal Nutrition®.

WORK WITH BAR NONE COUNTRY STORE TO CREATE A TAILORED PLAN TO MEET YOUR OPERATION'S GOALS.

The W4 Ranch

Bull Development

Our Bull Development Center is 100 acres that is divided into five paddocks with a 200 feet tall rock hill in the center.

After preconditioning, these bulls are divided by age groups and walked to the paddocks.

On one side of the hill is their water and on the opposite side, their feed source.

The distance is a half mile each way and requires climbing the rock hill. This procedure strengthens hocks and feet as well as builds muscle.

Bulls raised in this environment will work anywhere and gain as they are working.

The Hill

The Feedlot

"Our bulls will work anywhere and gain as they are working."

- ✓ Bulls weaned, vaccinated and wormed at 205 days.
- ✓ Bulls conditioned on starter ration for 21 days and then transitioned to a high rough-age ration for the remainder of the feed period.
- ✓ Bulls raised on high rough-age ration.
- ✓ Bulls weaning and yearling weights are adjusted.

Performance & Carcass

EPD Information

Calving Ease – Direct (CE)

CE EPD is based on calving ease scores and birth weights and is measured on a percentage. CE EPD indicates the influence of the sire on calving ease in females calving at 2 years of age. For example, if sire A has a CE EPD of 6 and sire B has a CE EPD of -2, then you would expect on average if comparably mated, sire A's calves would be born with an 8% more likely chance of being unassisted when compared to sire B's calves.

Birth Weight (BW)

BW EPD is an indicator trait for calving ease and is measured in pounds. For example, if sire A has a BW EPD of 3.6 and sire B has a BW EPD of 0.6, then you would expect on average if comparably mated, sire A's calves would come 3 lb. heavier at birth when compared to sire B's calves. Larger BW EPDs usually, but not always, indicate more calving difficulty. The figure in parentheses found after each EPD is an accuracy value or reliability of the EPD.

Weaning Weight (WW)

WW EPD is an estimate of pre-weaning growth that is measured in pounds. For example, if sire A has a WW EPD of 60 and sire B has a WW EPD of 40, then you would expect on average if comparably mated, sire A's calves would weigh 20 lb. heavier at weaning when compared to sire B's calves.

Yearling Weight (YW)

YW EPD is an estimate of post-weaning growth that is measured in pounds. For example, if sire A has a YW EPD of 100 and sire B has a YW EPD of 70, then you would expect on average if comparably mated, sire A's calves would weigh 30 lb. heavier at a year of age when compared to sire B's calves.

Scrotal Circumference (YSC)

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality, and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty. Yearling sons of a sire with a .7 SC EPD should have yearling scrotal circumference measurements that average 0.7 centimeters (cm) larger than progeny by a bull with an EPD of 0.0 cm. In the Hereford genetic analysis, a multiple-trait model was used for scrotal circumference. Weaning weight was used as a predictor variable to increase the prediction accuracy of SC EPDs. Therefore, an animal with a weaning weight EPD should also have a SC EPD.

Maternal Milk (MM)

The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability. Daughters of the sire with a +14 MM EPD should produce progeny with 205-day weights averaging 24 lb. more (as a result of greater milk production) than daughters of a bull with a MM EPD of -10 lb. (14 minus -10.0 = 24 lb.). This difference in weaning weight is due to total milk production during the entire lactation.

Teat Size (TEAT)

Scores range from 9 (very small) to 1 (very large, balloon shaped) and are subjective assessments of the teat length and circumference. Oversized teats are difficult for newborn calves to nurse, and the calf may not receive adequate colostrum. This could lead to a higher incidence of scours or decreased immunity levels in the newborn calf.

TEAT EPDs are reported on the scoring scale. Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment. For example, if sire A has a teat size EPD of 0.4, and sire B has a teat size EPD of -0.1, the difference in the values is 0.5, or one-half of a score. If daughters of sires A and B are raised and managed in the same environment, you would expect half a score smaller teat size in daughters of sire A, compared to sire B.

Ribeye Area (REA)

REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better-muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Marbling (MARB)

MARB EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat, [IMF]) based on carcass measurements of harvested cattle. Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Baldy Maternal Index (BMIS)

The Baldy Maternal Index is a maternally focused index that is based on a production system that uses Hereford x Angus cross cows. Progeny of these cows are directed towards Certified Hereford Beef. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake, but a positive weighting on Carcass Weight which is anticipated to provide profitability from finishing of non-replacement females and castrated males. Marbling and Rib-eye Area are also positively weighted to keep the harvested progeny successful for CHB. This index is geared to identify Hereford bulls that will be profitable when used in a rotational cross with mature commercial Angus cows.

Brahman Influence Index (BIIS)

The Brahman Influence Index is a maternally focused index that is based on a production system that uses Brahman x Hereford cross cows. Progeny of these cows are directed towards a commodity beef market since Certified Hereford Beef does not accept Brahman influenced cattle. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake, but a positive weighting on Carcass Weight which is anticipated to provide profitability in finishing non-replacement females and castrated males. Marbling and Rib-eye Area are also positively weighted to keep harvested progeny successful for a variety of commodity based programs. This index targets producers that use Hereford bulls on Brahman influenced cows.

Certified Hereford Beef Index (CHBS)

The Certified Hereford Beef Index is a terminal sire index that is built on a production system where Hereford bulls are mated to mature commercial Angus cows where all progeny will be targeted for Certified Hereford Beef after the finishing phase. This index has significant weight on Carcass Weight and Marbling to ensure profit on the rail. As well there is a positive weighting for Average Daily Gain along with a negative weighting on Dry Matter Intake to ensure efficient pounds of growth in the finishing phase. In addition, there is a positive weighting for Rib-eye Area and a negative weighting for Back Fat to maintain desirable Yield Grades. This is the only index that has no emphasis on fertility. Remember that no replacement heifers are being retained.

How To Participate

as an absentee buyer

VIEWING THE AUCTION ONLINE

The auction will be broadcast online at Bid.SuperiorLivestock.com and the pre-recorded videos will also be hosted there prior to and on sale day. You do not need an account or login just to watch the auction.

ONLINE BIDDING

Go to Bid.SuperiorLivestock.com for Superior's new online bidding platform. If you have not registered there before you will need to create an account if you wish to bid (there is no registration required just to watch the auction). Once you have created an account, request a buyer number and you will then be able to bid online with the largest and most trusted cattle marketing entity in North America. Superior's new platform allows you to see both the live stream of the auction AND the pre-recorded videos on one screen at the same time!

TURN IN BIDS OVER THE PHONE

This is Superior's suggested bidding method for anybody who does not have consistent, high-speed internet. You still must register an account at Bid.SuperiorLivestock.com and request a buyer number and upon doing so you will see the bid line phone number. Just watch the auction online and call in at least 2 lots ahead of the lot you are looking to bid on.

FOR HELP WITH REGISTRATION OR ANY PART OF THE BIDDING PROCESS PLEASE CALL SUPERIOR AT (800) 422-2117.

ADD VALUE

WITH FEEDER CATTLE & REPLACEMENT FEMALE PROGRAMS

HEREFORD ADVANTAGE

An industry-changing feeder cattle marketing program through IMI Global to verify and add value to Hereford-influenced feeder cattle with superior genetics, health and management.

MATERNAL ADVANTAGE

A unique marketing program designed to add value to Hereford-sired commercial replacement females with added fertility, feed efficiency, profitability and docility.

PREMIUM RED BALDY

Take advantage of hybrid vigor by maximizing the best traits of Hereford and Red Angus genetics that provide commercial producers with premium replacement females.

Front Foot Weighing System

Weighing made easy

The Front-Foot Weighing System is the latest addition to Gallagher's suite of innovative weighing and EID solutions.

This is weighing made easy: no work, just results

Weigh your animals more frequently without the extra trips through the chute

Easy to set up and deploy anywhere on farm

Suitable for feedlot or pasture-based systems

Receive accurate and real-time individual and group-level data straight to the web app via cellular comms (satellite comms coming soon!)

Developed and manufactured in Canada

Results you can count on

- ✔ Monitor the weight gain of multiple groups
- ✔ Target ideal weights for livestock marketing
- ✔ Optimize feeding programs
- ✔ Minimize risk of injuries and reduce stress on livestock
- ✔ Achieve operational efficiencies: less manual labor so you can channel staff into more productive tasks

How it works

- 1 Take the unit to your cattle; it is highly portable and set up only takes a few minutes.
- 2 Put an attractant like a salt block or molasses in the integrated trough which will entice the animal to voluntarily step on the platform.
- 3 The integrated EID reader identifies the animal. The front feet of the animal are weighed and an algorithm converts this to an estimated full body weight.
- 4 The collected EID and weight data are then automatically transmitted to the cloud and sends the information back to the web app.
- 5 View your data on the app: the app displays easy-to-understand data such as individual or group weights and growth over time.

Thank You...

for your interest in our Spring Sale.
