

Fall Production Sale

Friday, October 17, 2025 • 12:30 p.m.
at the Ranch, Morgan, TX

WELCOME

Dear Friends and Cattlemen,

We are pleased to invite you to the W4 Ranch Hereford Bull and Female Sale on October 17th, where we will be offering an outstanding set of registered Hereford bulls and females backed by proven genetics, performance, and breed-leading quality.

With abundant rainfall this year and favorable grazing conditions, we are proud to present a powerful set of Herefords that have developed exceptionally well. This offering represents the heart of our breeding program, with cattle selected for structural soundness, fertility, and productivity. In today's cattle market, efficiency and longevity are key and these genetics are built to add long-term value to your operation.

At W4 Ranch, we stand behind our cattle. Your confidence in our program matters, and we are committed to providing genetics that work as hard as you do.

We welcome you to arrive early to preview the cattle and join us for a complimentary lunch before the sale begins. For those unable to attend in person, the sale will be broadcast live with real-time online bidding available at [Live-Ag.com](https://www.live-ag.com).

Thank you for your continued support of the W4 Ranch and the Hereford breed. We look forward to visiting with you and welcoming you to the ranch on sale day!

Sincerely,

Jeff Chaffin, Manager
254/396-2785

★

**We are proud to present our
2025 Fall Cattle
for your evaluation!**

THE OFFERING

60 Two-Year-Old Hereford Bulls

10 Two-Year-Old Polled Hereford Bulls

50 Spring Calving Registered Hereford Heifers
Bred to Hereford Bulls

60 Spring Calving Registered Hereford Heifers
Bred to Angus Bulls

75 Spring Calving Commercial Hereford Heifers
Bred to Angus Bulls

20 Spring Calving F1 Black Baldy Females
Bred to Angus Bulls

SCHEDULE OF EVENTS

Friday, October 17, 2025

8:00 a.m. – Coffee, donuts and viewing of cattle

11:00 a.m. – Lunch served

12:30 p.m. – Fall Production Sale

**Sale will be broadcast
online at Live-Ag.com**

See page 56 for bidding information.

THE W4 RANCH BULL DEVELOPOMENT

Our Bull Development Center is 100 acres that is divided into five paddocks with a 200 feet tall rock hill in the center.

After preconditioning, these bulls are divided by age groups and walked to the paddocks.

On one side of the hill is their water and on the opposite side, their feed source.

The distance is a half mile each way and requires climbing the rock hill. This procedure strengthens hocks and feet as well as builds muscle.

Bulls raised in this environment will work anywhere and gain as they are working.

- ✓ Bulls weaned, vaccinated and wormed at 205 days.
- ✓ Bulls conditioned on starter ration for 21 days and then transitioned to a high roughage ration for the remainder of the feed period.
- ✓ Bulls raised on high roughage ration.
- ✓ Bulls weaning and yearling weights are adjusted.

PERFORMANCE & CARCASS – EPD INFORMATION

Calving Ease – Direct (CE)

CE EPD is based on calving ease scores and birth weights and is measured on a percentage. CE EPD indicates the influence of the sire on calving ease in females calving at 2 years of age. For example, if sire A has a CE EPD of 6 and sire B has a CE EPD of -2, then you would expect on average if comparably mated, sire A’s calves would be born with an 8% more likely chance of being unassisted when compared to sire B’s calves.

Birth Weight (BW)

BW EPD is an indicator trait for calving ease and is measured in pounds. For example, if sire A has a BW EPD of 3.6 and sire B has a BW EPD of 0.6, then you would expect on average if comparably mated, sire A’s calves would come 3 lb. heavier at birth when compared to sire B’s calves. Larger BW EPDs usually, but not always, indicate more calving difficulty. The figure in parentheses found after each EPD is an accuracy value or reliability of the EPD.

Weaning Weight (WW)

WW EPD is an estimate of pre-weaning growth that is measured in pounds. For example, if sire A has a WW EPD of 60 and sire B has a WW EPD of 40, then you would expect on average if comparably mated, sire A’s calves would weigh 20 lb. heavier at weaning when compared to sire B’s calves.

Yearling Weight (YW)

YW EPD is an estimate of post-weaning growth that is measured in pounds. For example, if sire A has a YW EPD of 100 and sire B has a YW EPD of 70, then you would expect on average if comparably mated, sire A’s calves would weigh 30 lb. heavier at a year of age when compared to sire B’s calves.

Scrotal Circumference (YSC)

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull’s own semen quantity and quality, and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty. Yearling sons of a sire with a .7 SC EPD should have yearling scrotal circumference measurements that average 0.7 centimeters (cm) larger than progeny by a bull with an EPD of 0.0 cm. In the Hereford genetic analysis, a multiple-trait model was used for scrotal circumference. Weaning weight was used as a predictor variable to increase the prediction accuracy of SC EPDs. Therefore, an animal with a weaning weight EPD should also have a SC EPD.

Maternal Milk (MM)

The milking ability of a sire’s daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires’ daughters’ progeny due to milking ability. Daughters of the sire with a +14 MM EPD should produce progeny with 205-day weights averaging 24 lb. more (as a result of greater milk production) than daughters of a bull with a MM EPD of -10 lb. (14 minus -10.0 = 24 lb.). This difference in weaning weight is due to total milk production during the entire lactation.

Teat Size (TEAT)

Scores range from 9 (very small) to 1 (very large, balloon shaped) and are subjective assessments of the teat length and circumference. Oversized teats are difficult for newborn calves to nurse, and the calf may not receive adequate colostrum. This could lead to a higher incidence of scours or decreased immunity levels in the newborn calf.

TEAT EPDs are reported on the scoring scale. Differences in sire EPDs predict the difference expected in the sires’ daughters’ udder characteristics when managed in the same environment. For example, if sire A has a teat size EPD of 0.4, and sire B has a teat size EPD of -0.1, the difference in the values is 0.5, or one-half of a score. If daughters of sires A and B are raised and managed in the same environment, you would expect half a score smaller teat size in daughters of sire A, compared to sire B.

Ribeye Area (REA)

REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better-muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Marbling (MARB)

MARB EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat, [IMF]) based on carcass measurements of harvested cattle. Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Baldy Maternal Index (BMIS)

The Baldy Maternal Index is a maternally focused index that is based on a production system that uses Hereford x Angus cross cows. Progeny of these cows are directed towards Certified Hereford Beef. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake, but a positive weighting on Carcass Weight which is anticipated to provide profitability from finishing of non-replacement females and castrated males. Marbling and Rib-eye Area are also positively weighted to keep the harvested progeny successful for CHB. This index is geared to identify Hereford bulls that will be profitable when used in a rotational cross with mature commercial Angus cows.

Brahman Influence Index (BIIS)

The Brahman Influence Index is a maternally focused index that is based on a production system that uses Brahman x Hereford cross cows. Progeny of these cows are directed towards a commodity beef market since Certified Hereford Beef does not accept Brahman influenced cattle. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake, but a positive weighting on Carcass Weight which is anticipated to provide profitability in finishing non-replacement females and castrated males. Marbling and Rib-eye Area are also positively weighted to keep harvested progeny successful for a variety of commodity based programs. This index targets producers that use Hereford bulls on Brahman influenced cows.

Certified Hereford Beef Index (CHB\$)

The Certified Hereford Beef Index is a terminal sire index that is built on a production system where Hereford bulls are mated to mature commercial Angus cows where all progeny will be targeted for Certified Hereford Beef after the finishing phase. This index has significant weight on Carcass Weight and Marbling to ensure profit on the rail. As well there is a positive weighting for Average Daily Gain along with a negative weighting on Dry Matter Intake to ensure efficient pounds of growth in the finishing phase. In addition, there is a positive weighting for Rib-eye Area and a negative weighting for Back Fat to maintain desirable Yield Grades. This is the only index that has no emphasis on fertility. Remember that no replacement heifers are being retained.

WHY IS THE PURINA® ACCURATION® AND PURINA® WIND & RAIN® MINERAL THE RIGHT FIT FOR MY OPERATION?

One size doesn’t fit all, especially in the cattle world. That’s why Purina ® Accuration® and Purina® Wind & Rain® Mineral give cow/calf producers flexibility to select from high-quality nutrition options to create a whole herd nutrition program that best fits their needs. Purina is the foundation for success with elite, complete nutrition programs. Producers can also choose to enter additional value-added programs that are amplified by the research-based and time-tested approach of Purina Animal Nutrition®.

WORK WITH BAR NONE COUNTRY STORE TO CREATE A TAILORED PLAN TO MEET YOUR OPERATION’S GOALS.

Terms of Sale

Terms of sale are CASH, to be paid in full at the conclusion of the sale. We will be glad to consider special terms if arrangements are made prior to the sale date. Contact Tom Johnson.

W4 Ranch is glad to work with international buyers to meet all necessary health requirements; however, buyers will be responsible for any costs associated with completing those requirements for shipment.

Sale Conditions

Each animal will be sold to the highest bidder with the auctioneer settling any disputes as to bids. Each animal will become the property of the buyer as soon as sold.

Guarantee

All cattle are guaranteed to be breeders; all females having been examined safe in calf will be considered as proven breeders. Any bull subsequently found to be a non-breeder may be returned in good condition and with our permission within six months of the sale date. We reserve the right to try any reported non-breeder for six months and if we cannot confirm the animal as a breeder will refund the purchase price.

Herd Health

Individual health certificates for interstate shipment will be furnished on all sale cattle. All test-age cattle will have been tested negative for Brucellosis. All the cattle have been vaccinated for 7-Way Blackleg, Lepto and wormed. Mark Jackson, DVM serves as our herd veterinarian.

EPDs

EPDs in this catalog were obtained on September 9, 2025.

527L has been a standout since day one! His dam, 6120, bred in the Indian Mound herd, is one of our absolute favorites. She consistently out-produces herself, with her last son topping our bull sale at \$30,000. His sire, Churchill W4 Sherman 2157K ET, has been one of the hottest Hereford bulls in the country this past year. 527L brings it all together—power, pigment, and calving ease in a truly impressive package. Homozygous polled.

Another powerful Sherman son with impressive dimension. This bull is extra deep through his rib, wide-topped, and carries plenty of muscle down into his hip. He combines thickness and balance with an attractive, dark red color and strong pigmentation. An excellent calving ease prospect that's ready to go straight to work.

Selling: Full interest and full possession.

This Marksman son is a rugged, high-performing bull backed by a proven Churchill female. He stems from the elite Ladysport cow family, a lineage known for consistency and quality. Deep-sided, stout-hipped, and powerfully made, he's the kind that will add pounds, eye appeal, and long-term value to any calf crop.

Selling: Full interest and full possession.

This Thomas County son is the product of an elite IVF embryo package we purchased from Churchill. His dam needs no introduction—she is also the dam of Sherman's mother and anchors one of the most proven cow families in the breed. Lot 4 combines superior genetic value with an impressive phenotype. He is deep-bodied, thick-topped, and powerfully muscled, yet still maintains the balance and structure that cattlemen demand. Backed by excellent teat and udder quality, he is a true growth bull with performance built in. Ranked in the top 10% for both BMIS and BII\$, this is a rare opportunity to add genetics that excel in both function and profitability.

CHURCHILL LADY 806F | DAM OF LOT 6

Selling: Full interest and full possession.

This 1115J son is a super stout, calving-ease horned bull with all the power and shape you could ask for. His dam, the productive 806 cow, has been a cornerstone female in our program—consistently raising top-quality sons, including several that have been standouts at the Houston All Breed Bull Sale. He carries extra muscle, structural integrity, and the genetics to pass along fantastic udder quality to his daughters.

CHURCHILL LADY 8266F ET | DAM OF LOTS 7 & 8

Lots 7 and 8 are full brothers, sired by Dominator 062H and out of the proven 8266 female. These bulls are thick-made, deep-bodied, and bred for consistency. Their dam, 8266, is a full sister to the mother of Churchill Desperado and is recognized for carrying a flawless udder.

Selling: 3/4 interest and full possession.

This bull is built with unmatched stoutness from the ground up—big, bold bone and packed with muscle. He stands on massive “tree trunk” legs and carries loads of red meat and power. His dam is a top Holden female tracing back to the legendary 5139R, bringing maternal strength to go with his performance. He also offers an exceptional birth-to-yearling spread, making him a complete package.

IS YOUR AGENT A LIVESTOCK SPECIALIST?

WE KNOW LIVESTOCK INSURANCE BECAUSE WE SPECIALIZE IN IT.

Our livestock insurance solutions are tailored to meet the unique needs of your operation, ensuring your are protected against unexpected events.

ANNUAL FORAGE
Protects forage plants grown for livestock feed against lack of rainfall, offering coverage that secures your feed supply through unpredictable weather conditions.

LIVESTOCK RISK PROTECTION (LRP)
Aids in managing price risk by providing coverage against market price downturns.

ANIMAL MORTALITY
Provides coverage for death, or humane destruction of a covered animal as a result of an accident, injury, illness, disease and/or disability occurring during the policy period.

PASTURE, RANGELAND, FORAGE (PRF)
A rainfall index program designed to provide coverage for losses of forage for grazing or harvested for hay.

PROPERTY & CASUALTY
Coverage for homes, buildings, equipment, livestock, crops, liability, and workers' compensation.
